The First Aeroplane Flight

Unit 6

Maths

In maths the children will complete a unit of work on telling the time. The children will be introduced to statistics and different representations of data for the first time. They will use tally charts to systematically record data. They will explore the use of simple tables and be introduced to block diagrams and pictograms as a way of representing data. The children will learn to interpret the data presented in these charts too. Finally, the children will use the language of position, recapping and building upon their learning from Year 1. They will continue to use Numbots to support their fluency.

English

Writing- The children will write a letter, a newspaper report and re-tell a story, using a video clip called 'Soar' and a text called 'Rosie Revere'.

Spelling— will be taught daily using the Little Wandle Letters and Sounds Spelling programme.

Reading— will be taught daily a whole class. In addition to this children will have the opportunity to read 1:1 with a n adult in school too. During the whole class reading sessions we will look at the skills of reading including: understanding vocabulary, inference, retrieval sequencing and prediction.

Home reading books —Changed every **Thursday**

Library books— Changed every **Monday**

Rainbow Reads— Counted every **Thursday**

Computing

This unit will recap on their learning from Year 1 using the Scratch programme . They will begin to understand that sequences of commands have an outcome and make predictions based on their learning. They will use and modify designs to create their own quiz questions using blocks of code. They will evaluate and make improvements to their work.

PSHE

In PSHE the children will learn why medicines are taken and where medicines come from. They will learn how to keep themselves safe around medicines. They will discuss how medicines can be used to manage and treat medical conditions such as asthma, and that it is important to follow instructions for their use.

RE

In RE the children will identify individuals who are respected by faith communities and link their attitudes and behaviour to their roles as an example of faith community. The children will identify important examples from faith stories and link these to the way believers might behave. They identify people they believe to be good examples and think about their influences.

Art

The children will learn that both aural and visual senses can be used to make art. They will draw from their imaginations, using lots of different kinds of abstract marks to express their feelings. They will make a three dimensional object which makes sound.

History

The children will be learning about the history of the first aeroplane flight. They will order dates relating to the history of flight from earlier to latest on simple timelines. The children will find out about the lives of significant individuals in the past who have contributed to national and international achievements linked with the history of flight, for example, Amelia Earhart.

Science

Children will identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses. They will find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.
